

ANCAP Safety Rating

HONDA CIVIC HATCH (May 2017 - onwards)

Honda Civic Hatch

This ANCAP safety rating applies to:

Make / Model	Honda Civic Hatch
Year Range	May 2017 - onwards
Variant(s)*	All variants except Type R
Vehicle Type	Small Car

The Honda Civic hatch was introduced in Australia and New Zealand in May 2017. The ANCAP safety rating for the Civic hatch is based on crash tests of the Civic sedan. ANCAP was provided with technical information which showed that the crash test results of the sedan also apply to the hatch. This rating applies to all hatch variants excluding the Civic Type R.

Dual frontal, side chest and side head-protecting airbags (curtains) are standard. Autonomous emergency braking (AEB), blind spot monitoring (BSM) and lane support systems (LSS) are available on some variants. A full list of safety features and technologies can be viewed within the *Safety Features & Technologies* table on page 2 of this report.

Occupant Protection.

Frontal Offset Test

Each body region is scored out of 4 points

Head / neck:	4.00 points
Chest:	3.45 points
Upper legs:	4.00 points
Lower legs:	3.30 points

The passenger compartment held its shape well in the frontal offset test. Pedal and steering wheel displacements were well controlled. Driver and passenger contact with the airbags was stable. All doors remained closed during the crash. After the crash all doors could be opened with normal effort.

Side Impact Test

Each body region is scored out of 4 points

Head:	4.00 points
Chest:	2.93 points
Abdomen:	4.00 points
Pelvis:	4.00 points

There was a slight risk of serious chest injury for the driver in this test, which was conducted on a vehicle without side chest or side head-protecting airbags (tested by ASEAN NCAP). ANCAP was provided with evidence that the Australasian model with side chest and side head-protecting airbags provides better protection in this crash test. The above scoring reflects the outcomes of the tested model.

Pole Test

Scored out of 2 points

Score:	2.00 points
--------	-------------

The Australasian-sold Honda Civic hatch was eligible for a side pole test because it has side head-protecting airbags. The vehicle scored the maximum 2 points for head protection in this test.

Whiplash Protection Test

Whiplash protection is assessed to the RCAR Protocol

Geometric test:	Good
Dynamic test:	Good
Overall whiplash rating:	Good

ANCAP Safety Rating

HONDA CIVIC HATCH (May 2017 - onwards)

Pedestrian Protection.

Pedestrian Test

Scored out of 36 points

Adult & child head impacts: 17.47 points
 Upper leg impacts: 6.00 points
 Lower leg impacts: 6.00 points

This vehicle scored 29.47 out of 36 points (Good). Performance was mixed for head impacts on the bonnet. The windscreen base could be modified for improvement. The bumper and leading edge of the car performed well for all leg impacts. (v8.3)

Child and adult head impact

Adult leg impact (upper and full legforms)

Score Deductions.

Deductions from frontal offset test scores

Head / neck: No deductions
 Chest: No deductions
 Upper legs: No deductions
 Lower legs: No deductions

Deductions from side impact test score

Head / neck: No deductions
 Chest: -1.07 points (excessive T12 load)
 Abdomen: No deductions
 Pelvis: No deductions

Deductions from pole test score

Head: No deductions

Safety Features & Technologies.

Descriptions of each of these safety features and safety assist technologies (SAT) and detail on fitting requirements for each star rating level can be found at ancap.com.au.

Safety Feature / Safety Assist Technology	Availability
Seat belts (three-point, lap/sash) for all forward-facing seats	S
Seat belt pretensioners (front)	S
Seat belt pretensioners (rear outboard)	X

* **Model Variants:** ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model. For further information about the application of ANCAP safety ratings to model variants, see the ANCAP Variant Policy.

^ **Rating Year:** The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and may be based on the year in which a new vehicle model is first launched into the Australian and/or New Zealand markets; the year in which the vehicle was tested (if tested by Euro NCAP); or, for vehicles which hold an existing ANCAP safety rating, the year in which the rating was updated (or earlier applicable year).
